SUMMARY

Software Engineer with 3+ years building and shipping web and mobile applications across the stack — React front ends, cross-platform mobile (Android/Cordova), MySQL data, and Jenkins CI/CD pipelines. Comfortable owning a feature end-to-end and managing applications throughout their lifecycle. I enjoy learning and thrive working in a rapidly evolving technology environment and leverage AI to accelerate my productivity and knowledge.

Currently pursuing a Master of Science in Information Systems (MSIS) at the University of Washington, Foster School of Business. U.S. Permanent Resident, open to roles in the Greater Seattle area.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Kotlin, SQL (MySQL), HTML5, CSS3

Frameworks & Libraries: React, Cordova

Data & Integration: REST APIs, native module integration

DevOps & Tools: Jenkins, Git, Postman, Android Studio, VS Code, IntelliJ IDEA

Concepts: OOP, SOLID Principles, Design Patterns, Data Structures & Algorithms, Responsive Design

PROFESSIONAL EXPERIENCE

Frontend Engineer (Member of Technical Staff), Zoho Corporation — Jul 2023 – Feb 2024

- Developed and maintained features for a customer-facing Inventory Management mobile application in Zoho's Finance suite, building the React front end and Android components in Java/Kotlin.
- Resolved production support tickets and shipped feature enhancements from user feedback during customer onboarding.
- Operated and maintained the EarnSmart application day to day, keeping the platform stable and performant.

App Developer (Member of Technical Staff), Gofrugal Technologies — Feb 2022 – Jul 2023

- Owned EarnSmart, a cross-platform (Android/iOS) sales-rep application built with React and Cordova, from UI through release — enabling reps to manage workloads, schedule orders and returns, track activity, and complete transactions.
- Integrated native deep-linking between the React app and Java/Android printer applications for seamless Bluetooth receipt printing. Partnered with product owners and customers to resolve production issues.
- Managed the full DevOps lifecycle in Jenkins across development, testing, and production, publishing regular releases to the Google Play Store.

Software Engineer — Web App Developer, Star Systems Pvt. Ltd. — Jan 2021 – Jan 2022

- Modernized and mobile-optimized a web application for an online estate-sales platform, migrating seller and admin portals from a legacy architecture to a modern React.js application.
- Built and enhanced seller and admin portal functionality, independently owning modules from design through release.
- Implemented responsive design across breakpoints and resolved bugs and support tickets to improve stability and performance.

EDUCATION

University of Washington, Foster School of Business — Seattle, WA — Expected Jun 2027
Master of Science in Information Systems (MSIS) — In progress

Madras Institute of Technology, Anna University — Chennai, India — Aug 2016 – Sep 2020
Bachelor of Technology (B.Tech), Information Technology
